WESTERN LITHIUM ANNOUNCES GRANT OF STOCK OPTIONS

Western Lithium Canada Corporation (the “Company”) (TSXV:WLC) is pleased to announce that it has granted incentive stock options for the purchase of up to 1,300,000 common shares of the Company, at a price of \$1.28 per share, for a five year period.

About Western Lithium

Western Lithium is developing the Kings Valley, Nevada lithium deposit into potentially one of the world's largest⁽¹⁾ strategic, scalable and reliable sources of high quality lithium carbonate. Western Lithium is positioning itself as a major U.S.-based supplier to support the rising global demand for lithium carbonate that is expected from the increased use of mobile electronics and hybrid/electric vehicles.

(1) Western Lithium has completed a National Instrument 43-101 resource estimate for the envisioned initial stage of development. The current resources are part of the historical estimate of 11 million tonnes of lithium carbonate equivalent (LCE) prepared by Chevron Resources and ranks in size behind deposits in Chile (32 million tonnes LCE), Bolivia (29 million tonnes LCE), North Carolina (14 million tonnes LCE) and the DRC (12 million tonnes LCE). Source: Roskill Information Services Ltd., R. Keith Evans, National Research Council and Western Lithium estimates. A qualified person has not done sufficient work to classify the historical estimate as current mineral resources under National Instrument 43-101, the Company is not treating the historical estimate as current mineral resources and the historical estimate should not be relied upon.
